

## **Kerry Group Graduate Programme – Technical Stream, Operations roles**

Kerry Group, a world leader in food ingredients and a leading supplier of consumer foods is recruiting for its Graduate Programmes to start in July/August/September 2014.

We have roles in Operations for candidates who are fluent in Polish and English to be located in both Poland (Olesnica) and across the UK and Ireland.

### **Operations roles:**

Kerry Group's multi-site production facilities offer Operations Graduates a dynamic environment in which to gain valuable experience running your own production line and being responsible for people management, raw materials, quality and costs. The pace is fast and within six months you could be in charge of your own production team.

Every day, a new set of challenges. Your area and plant equipment will need to be checked and tested. You will need to meet with your line manager to discuss staffing, efficiency and yield issues, all the while you will need to ensure your team knows exactly what is required and constantly monitor and motivate them.

Within six months you could be in charge of your own production team of anything up to 50 staff.

### **Who we are looking for:**

In fast-moving, ever-evolving markets like ours, we're looking to recruit ambitious graduates:

- Fluent in Polish and English
- genuinely excited and motivated by challenge and change
- who are keen to travel or relocate throughout their career
- genuinely passionate about the food industry
- For Operations, you will have a 2:1 minimum degree in Business, Food production Management, Engineering, Operations / Production Management, Process Control, Product Design and Manufacture or similar degree.

If you think you have what it takes to become a future leader in Kerry apply online at [www.kerrygraduates.com](http://www.kerrygraduates.com).

We recruit on a rolling basis and welcome applications throughout the year, however, if you are looking to commence employment by September 2014 we recommend submitting your application no later than 31 January 2014.
