

EAGLE EYE STAFFING SOLUTIONS

**Junior IT Specialist / Graduated IT Developers
(Java, .Net, Oracle, SharePoint)**

For our prestigious client, **an international company located in Warsaw** (very suitable location for the Warsaw's underground metro communication), we are currently looking for **candidates interested in professional development in the management consulting environment**.

Job requirements:

To be successful in this position you should be **a recent university graduate of informatics or computer science**, with very good graduation mark and **speak very good English**. An ideal candidate should also possess knowledge/experience in software development (**Java, .Net, Oracle, SharePoint**).

Our client also appreciates candidates with some internship experience, customer service focus, positive attitude and willingness to develop in a very international environment with access to **projects in Western Europe**. We are looking for programmers with potential to work in a position where technical, analytical and functional skills will be mixed, your skill set will be constantly developed and the company will provide you with all necessary training. The work will be mainly done in Poland but some limited mobility might be expected.

Our client offers an excellent opportunity to gain **valuable, unique professional experience, attractive salary and social benefits package**, as well as an **access to the latest technologies and challenging projects**.

If you find this offer attractive, do not hesitate to send your CV in English with a scanned copy of your diploma and a short cover letter to us.
