

We're hiring!

Research Analyst Intern

[Apply now](#)

Description

SalesAct is a Customer Success Platform that has introduced a revolution in the world of Internet marketing experience. We have everything what it takes to find, attract and engage customers! We are a global marketing cloud platform that supports entrepreneurs by means of the latest technologies in fields like demand generation, marketing automation, analytics or CRM.

Our goal is to take SalesAct to the next level and we are looking for talented team members to join us.

SalesAct, guarantees a package of unique benefits which makes working more comfortable and fun. Developing a new project provides a sense of personal ownership which is a truly satisfying and priceless reward. Our success is your success you will be proud of.

So if you have the skills and passion **fuel**, we are the **rocket** you need to join!

Role in the project:

You will work in an international environment and cooperate with top talents from technology, software, digital marketing, management and design areas. Dynamic technology projects will challenge you to stay up to date, perform your best and constantly grow.

Sounds interesting? Look what your job is all about:

You will help us make the right business decisions by presenting us data which you have collected and analyzed. We will empower you to face challenges such as:

- Delivering benchmark assessments and searching for the best market practices so we can take examples from and come up with solutions our clients will love
- Gathering research expectations from teams and the management board
- Collecting and analyzing data, then building databases which you will be updating regularly
- Collaborating with skilled team members: UX/UI Designers, project managers, new business managers and the management board to provide synergy thanks to multidisciplinary team work

Apply now and let's create products that we will be famous for.

Paid, full time internship with opportunity to become „regular“ team member

Join us if you are excited about being part of an innovative revolution in connecting customers by Cloud Computing solutions.

- Delivering comprehensive reports and presentations with conclusions and solutions to help us make the right decisions which will make you a reliable business advisor
- Gathering research expectations from teams and the management board
- Collecting and analyzing data, then building databases which you will be updating regularly
- Collaborating with skilled team members: UX/UI Designers, project managers, new business managers and the management board to provide synergy thanks to multidisciplinary team work
- Delivering comprehensive reports and presentations with conclusions and solutions to help us make the right decisions which will make you a reliable business advisor

Requirements
